Art Unit: 2836

The following is an examiner's statement of reasons for indicating allowance of claim 1: The prior art discloses a semiconductor integrated circuit device comprising a first Schmidt trigger circuit, but does not disclose that the first Schmidt trigger circuit comprises a first inverter section that is connected at its input to the other end of the resistor and the other end of the capacitor; a second inverter section that is connected at its input to the output of the first inverter section; a third inverter section that is connected at its input to the output of the second inverter section and is connected at its output to the gate of the first NMOS transistor; and a fourth inverter section that is connected at its input to the output of the second inverter section and is connected at its output to the input of the second inverter section. This feature in combination with the rest of the claim limitations is not anticipated or rendered obvious by the prior art of record.

#### **EXAMINER'S AMENDMENT**
